PRICING CONVERSION GUIDELINES

Most prices in this book for parent size sheets are listed as price per hundred weights (CWT). The following formula and example demonstrate how to convert this into price per M (thousand sheets) and price per carton.

$$\text{Price Per M} = \frac{\text{Price Per CWT} \times \text{Paper M -Wt}}{100}$$

$$\text{Price Per CARTON} = \frac{\text{Sheets Per Carton} \times \text{Price Per M}}{1000}$$

Example: Sample Price Page

	1	4	16	5M
Price Per CWT	<u>Ctn</u>	<u>Ctn</u>	<u>Ctn</u>	<u>lbs.</u>
White	195.60	175.20	149.20	138.20

CARTON PACKING AND STOCKING SCHEDULE

	Sub 24	
<u>Size</u>	<u>M-Wt</u>	<u>Ctn</u>
8.5x11	12	5000
17.5x22.5	51	3000
22.5x35	101	1500

To figure the price of 1 Ctn 22.5x35

$$\text{Price Per M} = \frac{\text{price per cwt.} \times \text{m-wt}}{100} : \frac{\$195.60 \times 101}{100} = \$197.56\text{M}$$

$$\text{Price Per Carton} = \frac{\text{sheets per carton} \times \text{price per m}}{1000} : \frac{1500 \times \$197.56}{1000} = \$296.34$$

NOTE:

We do our best to keep prices up to date. Please call for current pricing.
Prices subject to change without notice.
